U.I.C.C.
MAR 8 1976
LIBRARY

Printed in Sweden by

Almqvist & Wiksell, Uppsala 1975

Editor
B. BOLIN
Stockholm
Sweden

Executive Editor
M. SKÅRMAN
Stockholm
Sweden

Office of the Editor: Arrheniuslaboratoriet, Fack, S-104 05 Stockholm

Contents

Volume 27, 1975

NUMBER 1

C. M. Tchen: Cascade theory of turbulence in a stratified medium 1

S. Friedlander: Interaction of vortices in a fluid on the surface of a rotating sphere 15

A. G. Kjelaas, E. E. Gossard, J. M. Young and W. R. Moninger: Dispersion and spectra of gravity waves probably generated by a convective storm 25

A. Nyberg: An experiment in forecasting monthly mean temperature in Stockholm 34

G. E. Shaw: The vertical distribution of tropospheric aerosols at Barrow, Alaska 39

S. Tsunogai: Sea salt particles transported to the land 51

W. Bischof: The influence of the carrier gas on the infrared gas analysis of atmospheric CO_2 59

G. I. Pearman and J. R. Garratt: Errors in atmospheric CO_2 concentration measurements made at monitoring stations 62

I. E. Galbally: Emission of oxides of nitrogen (NO_x) and ammonia from the earth's surface 67

M. A. Goldman: NO_2 measurements on the Island of Hawaii 71

I. J. Eberstein and A. C. Aikin: Behaviour of nitric oxide trails deposited in the mesosphere and stratosphere 75

Shorter Contribution

L. La Valle and P. Di Girolamo: Determination of the geostrophic drag coefficient 87

Errata

U. Schmidt: Molecular hydrogen in the atmosphere 93

C. Y. Tsay: A note on the methods of analysing traveling waves 95

NUMBER 2

A. Bjerhammar: Discrete solutions of the boundary value problem in physical geodesy 97

J. R. Holton: On the influence of boundary layer friction on mixed Rossby-gravity waves 107

S. Srivatsangam: On the standing-eddy sensible-heat transport reversal in the polar region of the northern hemisphere during winter 116

R. V. Godbole and S. K. Ghosh: The structure of the inter-tropical convergence zone and equatorial westerlies during MONEX-1973 123

L. Peng and H. L. Kuo: A numerical simulation of the development of tropical cyclones 133

J. W. Searle and D. R. Davies: The sensitivity of dependence of large scale flow characteristics in a four-level model atmosphere on a simulated planetary boundary layer 145

J. W. Searle and D. R. Davies: A note on the effect of grid-point numerical errors on the large scale flow characteristics of a four-level model of the atmosphere 155

G. V. Rao and J. Fishman: An iterative initialization scheme for mesoscale studies 157

H. Oeschger, U. Siegenthaler, U. Schotterer and A. Gugelmann: A box diffusion model to study the carbon dioxide exchange in nature 168

NUMBER 3

R. D. Cess: Global climate change: an investigation of atmospheric feedback mechanisms 193

A. Wiin-Nielsen and H. Fuenzalida: On the simulation of the axisymmetric circulation of the atmosphere 199

D. G. Vincent and L. N. Chang: Kinetic energy budgets of moving systems: Case studies for an extratropical cyclone and hurricane Celia, 1970 215

L. N. Lahiff: A numerical study of a subtropical cloud free marine stable layer 234

R. B. Hill and J. A. Johnson: A three-dimensional theory of coastal currents and upwelling over a continental shelf 249

E. J. Wolanski and L. M. Brush, Jr: Turbulent entrainment across stable density step structures 259

L. Hatton: Stagnation point flow in a vortex core 269

B. Bolin and C. Persson: Regional dispersion and deposition of atmospheric pollutants with particular application to sulfur pollution over Western Europe 281

G. I. Pearman: A correction for the effect of drying air samples and its significance to the interpretation of atmospheric CO_2 measurements 311

Shorter Contributions

S. B. Idso: Low-level aerosol effects on earth's surface energy balance 318

R. C. Schnell and G. Vali: Freezing nuclei in marine waters 321

Errata 324

NUMBER 4

J. Egger: A statistical-dynamical model of the zonally averaged steady-state of the general circulation of the atmosphere 325

R. H. J. Grimshaw: A note on the β-plane approximation 351

J. A. Whitehead, Jr: Mean flow generated by circulation on a β-plane: An analogy with the moving flame experiment 358

S. Srivatsangam: On the efficiencies of atmospheric processes 365

A. Nir and S. Lewis: On tracer theory in geophysical systems in the steady and non-steady state 372

T. Green and L. A. Yeske: Horizontal turbulent energy transfer associated with a Great Lakes coastal current 384

R. E. Munn: Suspended particulate concentrations: spatial correlations in the Detroit-Windsor area 397

F. Herbert: A reexamination of the equilibrium conditions in the theory of water drop nucleation 406

M. T. Reischel and G. Vali: Freezing nucleation in aqueous electrolytes 414

Letters to the Editor

A. D. Kirwan: Comments on "On four-dimensional data assimilation" 428

I. Holmström: Reply to A. D. Kirwan 429

S. C. Mehrotra: Some experimental observations of upstream disturbances in a two-fluid system 430

R. R. Long: Reply to S. C. Mehrotra 431

NUMBER 5

G. J. Boer: Zonal and eddy forms of the available potential energy equations in pressure coordinates 433

P. G. Price: A comparison between available potential kinetic energy estimates for the southern and northern hemispheres 443

R. V. Madala and S. A. Piacsek: Numerical simulation of asymmetric hurricanes on a β-plane with vertical shear 453

B. M. Misra: Evidence of the 5-day period oscillations in the geopotential field 469

J. C. J. Nihoul and F. C. Ronday: The influence of the "tidal stress" on the residual circulation. Application to the Southern Bight of the North Sea 484

J. M. Walker: On summer atmospheric processes over south-west Asia 491

Z. Levin and W. D. Scott: The effect of eletrical conductivity on the growth of the electric field in a thunderstorm 497

R. D. H. Low: Microphysical and meteorological measurements of fog supersaturation 507

K. Fukuda and S. Tsunogai: Pb-210 in precipitation in Japan and its implication for the transport of continental aerosols across the ocean 514

K. Fischer and H. Grassl: Absorption by airborne and deposited particles in the 8–13 micrometer range 522

S. G. Ferraes: Statistical and probabilistic dependence between magnitude and time-interval for Mexico City earthquakes 529

Shorter Contribution

M. A. Kessick, J. V. Matson and D. M. Pipes: Co-distillation of boric acid with water under ambient conditions 538

NUMBER 6

J. Adem: Numerical-thermodynamical prediction of mean monthly ocean temperatures 541

D. Guedalia, A. Druilhet and J. Fontan: Détermination des flux de vapeur d'eau entre la couche limite planétaire et l'atmosphère libre 552

O. E. Thompson and R. T. Pinker: Wind temperature profile characteristics in a tropical evergreen forest in Thailand 562

P. A. Davies and G. Walin: Some exploratory experiments with a new type of rotating, differentially-heated fluid annulus 574

A. Svansson and J. Szaron: Sea level computations of the Baltic with a 20-canal model 596

F. Chew: The interaction between curvature and lateral shear vorticities in a mean and an instantaneous Florida Current, a comparison 606
